If you want your influence to go beyond a changed habit or a temporarily improved bottom line, this leadership development presentation is for you. It introduces a unique leadership model that's focused on the greatest serving leader of all time – Jesus of Nazareth. Participants discover the power of leading from the basis of vision, relational influence, and service. Designed for business and non-profit leaders, this interactive workshop will help you develop and enhance your serving leadership skills.

Topics include:

- How leading the few can impact the many.
- How to ground your leadership in humility.
- How to develop a compelling vision based on the serving leadership point of view of Jesus.
- How to adjust your leadership style when developing others.
- What disciplines are needed for sustaining long-term success.
